

iXa Search Service

SPEEDING DATA COLLECTION AND COLLATION

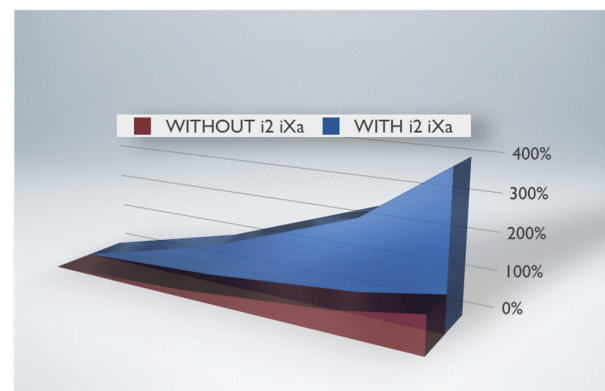

Accelerating Your Mission.

iXa Search Service is the innovative information sharing and search solution within the i2 Intelligence-Led Operations Platform that exponentially increases analytical productivity by automating and accelerating the lengthy process of capturing, enriching and collating data.

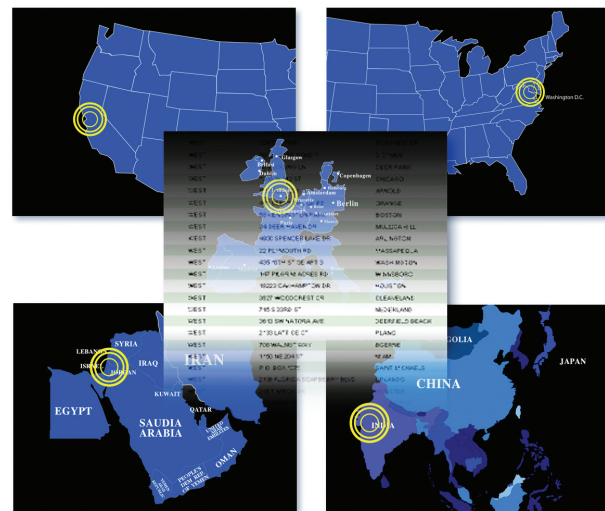

Analyst's Notebook users can now gather data from multiple sources and locations and collate and process the data to quickly begin analysis. In seconds, *iXa Search Service* securely logs in to local or global data sources, initiates smart searching to automate “analyst-like” data collation techniques and provides immediate access to results ranked by accuracy. The robust pre-analysis tools empower analysts to quickly minimise the vast amount of information and identify the relevant data; all from within *Analyst's Notebook*.

Speeds long & time-consuming data collection processes

- Advanced multi-source searching technology simultaneously connects analysts to multiple data sources across local or global networks in seconds
- Easy to use google style searching meets the needs of a wide range of analytical expertise, from beginner analysts to search engine savvy researchers
- Full-text searching finds mission critical information hidden within sources, such as in text fields or documents

Boosts the timeliness and volume of intelligence a division produces

Multi-source search results are returned in seconds as one analysis-ready list

Boost Analytical Divisions' Productivity with *i2 Analysis-Ready Search* Technology.

PART OF THE INTELLIGENCE-LED OPERATIONS PLATFORM

Automates lengthy and tedious data collation procedures

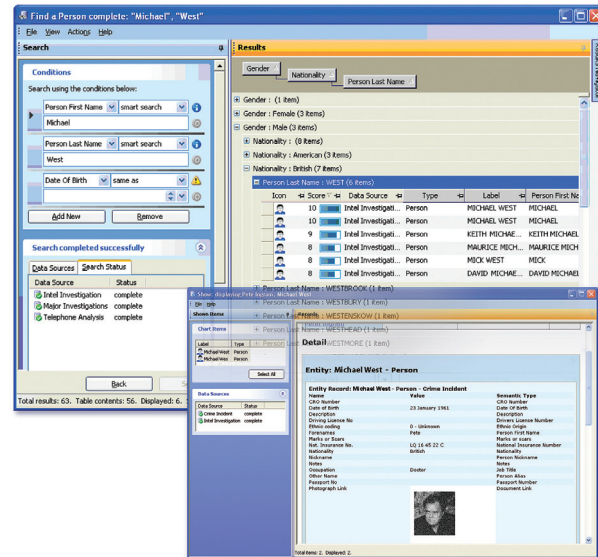

- *Smart Searching* technology automates analyst-like research methods, querying each data source to account for human factors and data entry errors. Such errors can encompass name variations, synonyms, typographical errors and similar sounding words
- Search results are returned as one list, prioritised and ranked by relevance ensuring that analysts are directed to key focus points within data in seconds
- Robust pre-analysis tools sort, group and filter the data, quickly shrinking vast amounts of information down to relevant and manageable result sets

Work in a familiar environment, fully integrated within *Analyst's Notebook*

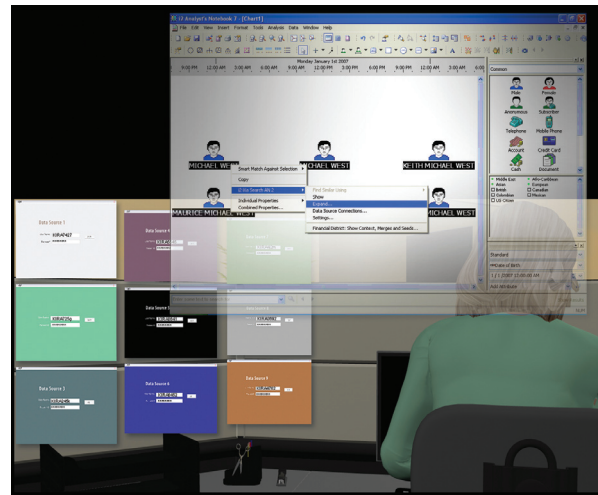

- *i2 Analysis-Ready Search Results™* are analytically modeled as data is returned formatted to show entities, links and properties, ready for immediate visualisation and analysis without data re-entry
- Analysts never have to leave their analysis environment and can continuously launch multi-source searches directly from their charts
- Single sign-on ensures analysts can expand the search out to multiple levels instantly directly from their chart without having to log back in to any data source

iXa Search Service

- Connects to and searches multiple sources simultaneously in seconds
- Results are returned as analytically-modeled data ranked by relevance
- Automates analyst-like querying techniques to ensure thoroughness
- Provides powerful pre-analysis tools to quickly shrink large volumes of data to what is relevant
- Fully integrated within *Analyst's Notebook* to provide automated data acquisition

Powerful pre-charting analysis tools quickly shrink potentially vast amounts of data

Continuous intelligence development without ever leaving the chart
